REASONS FOR ALLOWANCE

1. Claims 1 and 4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "an adhesive layer formed with a chrome film and a copper film from the underlayer film side; a reflection film made of silver (Ag); a reflectance adjusting layer; a protective film containing silicon monoxide (SiO) and having a film thickness of not less than 5 nm and not more than 20 nm" as set forth in the claimed combination. Claim 4 is also allowable based upon its dependence on claim 1.

The prior art of record teaches a reflecting mirror comprising a plastic substrate and a stacked structure formed on a plastic substrate, the stacked structure comprising an underlayer film made of aluminum oxide and a reflection film made of silver. However, the prior art of record does not teach that the stacked structure from the plastic substrate side sequentially comprises an underlayer film made of aluminum oxide, an adhesive layer formed with a chrome film and a copper film from the underlayer film side; a reflection film made of silver (Ag); a reflectance adjusting layer; and a protective film containing silicon monoxide (SiO) and having a film thickness of not less than 5 nm and not more than 20 nm and there is no motivation or teaching to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
